GUY C. FULTON, A.I.A.
HEAD ARCHITECT

GAINESVILLE, FLORIDA

September 28, 1951

Dr. George W. Gore, Jr., President
Florida A. & M. College
Tallahassee, Florida

Re: Science Building
A. & M. College

Dear Dr. Gore:

I wish to acknowledge your letter of September 25
and the attached copy of suggested changes in the proposed building.

We will review this list carefully and make all of
the changes which we possibly can. In the event that any of the
changes are impossible or too costly we will notify you so that the
matter can be worked out as satisfactorily as possible.

Very truly yours,

GUY C. FULTON

Re: Library Addition for Law and
Science Hall
Florida A and M College

Dear Dr. Gore:

I am attaching a copy of letter dated
December 3 from the Federal Security Agency, stating
that delay of approval for the allotment of critical
material is necessary on both projects.

It is apparent that the lack of CMP
approval will delay the taking of bids for the second
quarter of 1952.

Very truly yours,

GUY C FULTON

Mr. Guy C. Fulton
Architect to the Board of Control
Building E, University of Florida
Gainesville, Florida

December 3, 1951

Project No. EH-0568-08-020
Science Building, A. & M. College
Project No. EH-1008-08-020
Library Addition for Law, A and M
College
Project No. EH-0976-08-035
Geology Building, Florida State
University
Project No. EH-1007-08-035
Demonstration School, Florida
State University

Dear Mr. Fulton:

Reference is made to your application requesting allowments for the above-mentioned projects on which you hope to commence or continue construction. We regret that action has been delayed on this application but this delay was necessary due to the limited allocation of materials received by our office from the Defense Production Administration.

Allotments for the Fourth Quarter were sufficient to carry forward most of the projects under way, but did not allow for more than a handful of new starts. We had hoped to have a sufficient allotment in the First Quarter of 1952 to provide for at least some of those delayed projects. At this time the First Quarter of 1952 Allotment has been received and it is insufficient to care for any new starts. The allotment, in fact, will provide for only about one-half of the projects which are already underway and, unless substantially increased, will require us to actually recall allotments already outstanding on such projects.

We have carried forward all pending applications to be considered against whatever allotment is received for the second quarter of 1952. We shall notify you regarding the possibility of a start in that quarter at the earliest possible date, but probably not before January 15, 1952.

Sincerely yours,

J. T. Thomas
Consultant
Division of Civilian Education Requirements
