Dearest Comrade,

See we lost another comrade, as always it saddens me, especially a warrior. I told you I assume nothing anymore so won't speak on what should have been ect. In the past I dealt with alot of political things on a personal level and thus made decisions based upon a one sided view, which leads to subjectivity. You on the other hand won't give up any information on facts because you want to handle them yourself which I can understand. In some cases it is a mark of growth and strength but it in no way is a sign of weakness to express the situation, especially since this is a collective effort. The inter-connection, interdependence, inter-relationship of phenomena is real, it applies from the highest to the lowest levels of relationships and interacts on others.

Check this out it's time to start drawing lines (clear) of demarcation with people, if their sitting on their asses, either cut them loose or make them get on the case. A lot of the problems you have been confronted with stems directly from people's half-hearted, basic attitudes, and method of work, people must understand this ain't no joke and not to be taken lightly or at one's convenience. Sincere revolutionary love must be expressed and not some fine bullshit, if people say their care for children then let them show it through practice, it is not the masses who are lagging but the Vanguard. Things get done when people decide to do them, we must live a revolutionary life of dedication and self-sacrifice, if it sounds cold and unfair, see how cold and unfair oppression is, if you love the people you'll sacrifice many & all for them. We tell comrades to exercise

That was Karata who was busted, gonna check on him and see how he's doing.

free will but forget that there's not free people and without making them choose we'll always be wondering about what they'll do next. If you haven't already, you should have some back up safe houses, meet comrades at a neutral crib, keep contact between liaison personal, use telephone booths, certain day's & hour, that way you can call or receive a call from comrades, change booths. Use trusts worthy comrades to do things, have people keep check up and report progress or lack of it of work. One must be a 24hr a day revolutionary, effort must be exerted again this is no joke. Where there is struggle there is scars & fire should not be taken lightly, we are making mistakes when we think we can live like other people for we are ~~denying~~ the reality of our situation. The sooner we liberate some territory the sooner life as people live it can be resumed, there is nothing individual involved here what happens to one happens to us all, so hook up something good for the children, safe houses and reliable people, you said you had good comrades and least they can do is watch and care for them, do that for them as well as the other comrades, the safer the place the more you can see them. Spoke to Nick last night (Sunday) and he sounded real good, your sister said he's a beautiful child just hopes he doesn't have to leave there, believe me, i haven't heard Tim Sunset so good in some time. Work on the things i mention, okay and be forceful in your dealing with people not soft nor over bearing but firm. It is better to be disliked personally yet respected for getting things done & saving lives, when they truly understand they'll love you.

For Love & Struggle
