RE: Topeka Trip and Brown Status

I will send copies of the deposition transcripts when they arrive to any of you who want them. You should look them over to see what additional information they give us and, as importantly, what other information they suggest we should be seeking. For example, are there people referred to we need to depose? Documents in existence we want to get? Etc.

I did two things on this trip in addition to depositions. First, I looked at state documents. They first showed me the Annual Report or Superintendents' Report which they have for every year. I looked at 1978-79 and 1982-83 versions which were very similar. The report contains no race numbers. It does contain data on

staff -- number, salary total, salary average, fringes,  
FTE's by each category;

students -- September 15 enrollment, students in special categories (part-time, attending outside district, from outside district, educated in institutions, special ed.), drop outs;

schools/district -- number of schools, a yes/no checklist on some accreditation standards (I have a copy of accreditation standards and will send it to any of you on request), lots of data on transportation, a list of school closings.

Attached to the Superintendents' Reports are annual reports by principals for each school. The High School, Junior High, Middle and Elementary Reports are similar but not identical. Basically, they give

designation desired: Comprehensive or Accredited (more on this as I figure it out);

students -- enrollment numbers and data on where graduates went (college, work, vocational school, military, etc.);

staff -- number of counselors (including hours and experience), librarians, all other staff;

schedules -- units of credit taught and required, period hours, daily schedule, class schedule showing every teacher for every period and room;

supplies -- lots of data on media centers such as number of books, films, tapes, budget, etc.;

other -- compliance with fire and health codes.

Elementary schools in recent years have pupil-teacher ratios for every school and more questions on PE and athletics. In an earlier version, they supplied a print-out on every teacher giving name, number, certificate code and expiration date, salary, 89-10 or not (huh?), instruction code, grade level -- all listed by school.

I also looked at the Annual Statistical Report which state education takes off its computer. It has data on

facilities -- number of schools in use, open, abandoned, new; number of rooms for all these categories by whether in public place or not; capital outlay on new, additions, remodeling, temporaries, equipment, furniture; buildings and classrooms and special rooms needed;

money -- bond and school property data, indirect costs, federal program expenditures

students -- attendance total, attendance average, total membership, average membership by K., elementary, middle, high, and total -- no race data;

miscellaneous -- days in session, data on summer schools, endless detail on transportation.

I also looked at the Equalization Aid Print-Out which is how the State figures state aid and includes lots of enrollment data, some employment data and some per peril data. The final actual report I saw was the Budget Certificate which has lots of budget data but none by school. So far no race data.

The State also supplied me with blanks of all of the forms listed in their Interrogatory Answers. Few look to be of any value at all though many have enrollment data. We should think

about getting filled in copies of the following to see if we want more (see attached list):

52-4 -- includes questions on regulatory standards

52-29, 30, 31, 32, 35, 36, 37, 38, 39, 40, 47 -- these are the major Title I forms and they have plenty of spaces for race numbers, narrative explanations of need, evaluation of program;

52-49 -- bilingual need and numbers data;

52-56, 57 -- narratives on need and evaluation;

52-67, 68 -- minimum competency test data;

52-88, 89, 109 -- primarily budget data, these contain race/special education;

52-111 -- narrative and evaluation;

52, 17 -- potentially our best because it evaluates schools including how they meet minority needs but not clear on whether vocational technical only or all schools;

52-124-127 -- has vocational education race data.

I also learned from the forms that the State board approves issuance of bonds under \$20,000 (52-11), that it appears that 501 has some Title IV, Part B responsibility for private schools and special education in all schools. (52-53, 52-107).

On all of the above Bill and Rich should look to see if they want us to get any of it or if they want to see samples. Elvia and I should talk about this in the context of where we go next.

My second big non-deposition project was locating pre-annexation documents. I found a gold mine at the County Recorder of Deeds (Ms. Jean O'BRIEN). She told me that she could recall that Pierce and Bellvoir (once called Bellview) were all black schools. (As I said to Bill, does the word vestige seem relevant?) I am attaching the lists of county schools she gave me and a chart on disposition of County School Board Records. She believes neither the County Commissioners nor the County Clerk have any data, but the State Board may have some. As the chart shows, the State Historical Society may have some.

The Registrar has a number of bound and ring-binder books on the bookshelf. Although the sets may not be complete, I found

1. student data, mid-1800's-1966 with race data up to and including 1953;

2. high school teacher data including enrollment numbers for some of 1958-1966 -- no race numbers;
3. elementary school data similar to HS except 1958-1964;
4. Avondale students data 1949-55 -- no race data as of 1953;
5. some scattered Highland Park data;
6. some treasurer's records;
7. all boundary data. This is in poor shape and includes some legal descriptions and some maps but appears to cover every year and school.

She also has two file cabinets of county superintendents' data as follows (Cabinet 1 is on left, drawer 1 at top)

Cabinet 1, Drawer 1 -- some enrollment data, some 1968 correspondence;

Cabinet 1, Drawer 2 -- unification instructions, educational directories with some enrollment data;

Cabinet 1, Drawer 3 -- maps

Cabinet 1, Drawer 4 -- minutes of Boards -- very thin;

Cabinet 2, Drawer 1 -- budget and financial statement;

Cabinet 2, Drawer 3 -- directories for many years including personnel, some boundaries.

Bill Lamson should definitely look at this as soon as possible. I will be thinking in the next couple of days about what I should do next. I'll call to see if we want to coordinate another trip. If necessary, Rich or Elvia or Bill R. can get Bill L. help with that stuff.

Finally, everyone should know Bill L. agreed with Elvia and me that we should not decide what to do about the school board's microfilm data on race 56-66 until we see whether we need it or not. I also want to be sure everyone hears what Gary and Chuck Henson told me about annexation law. Prior to unification, school board annexation was synonymous with city annexation. The city acted, carrying the schools with them. Since unification, annexation is either ordered by the State or agreed to by the districts and approved by the State.

Dan Biles told the court he will bring a motion to dismiss the Governor. He wants us to consent. I said probably not. All the lawyers need to discuss how we will oppose that.

<u>Ex No.</u>	<u>Name of form</u>	<u>frequency of filing</u>
2-1	Estimating Postsecondary Aid	Every 3 months
