

# AcuMed Wellness Symposium

9/2/90

Hi 'YA' doin' MALIKA,

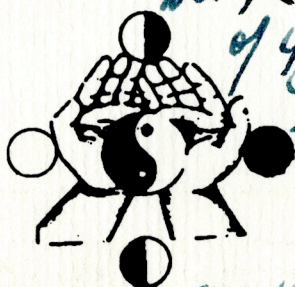

Hope you find herbal medicine to your need and liking. I took into consideration your case history going back over a decade in compounding herbal formula; the formula is tailored to your general and specific needs. Each herb in the formula is geared to normalize, regulate and adjust organ functions; and each herb will work synergistically to address each and every function in your body.

So please take them as suggested and I'm sure you'll get the desired result.

You remain a special friend in my life - including your family. I "WUZ" delighted to hear your children are doing OK. I think it's remarkable especially in view of what's going on today. Well, I reckon it's all a reflection of your character and determination.

As I mention to you on phone, "Negros" here in Phoenix are generally indifferent and aloof. "Stupid poor self-esteem. Whitey, on the other hand, is very receptive to natural health care. We're a lost people, but hopefully our children will be a different breed.

It was good to hear that you're studying for the Priesthood. I'm sure you'll be able to make a worthwhile contribution. Well, I'll be happy to read to some of your short stories etc. please send me some of your writing. Take care your friend

My regards to family -

Richard
