AsSAHAMU ALAIKUM!

This come to say that all is well. I am so happy and busy with trying to get organized for money. For this has be some experience in my life this year, which has cause me to know that Allah is God and that if we are muslims we must have complete faith in the help of LA- I- LA HA IH- LAK- LAH And hold firm to this in all stages of life.

I know it have not been easy for you, but we are the greatest contributor to our problems and life pains. As long as we think that we are in control of the change of mankind we continue to create uss within and without. Mankind and man or woman must be change for within and this is the making or the beginning of his society or community.

On the held mankind has been starv among by his own will and it will be his deeed save he turn to his lord and the help in LA-I-LA-HA-IH-LAK-LAH This is the beginning of me, you, your children and the whole of man.

Today, re-firme your faith so you may

Have the chance to raise your family in
peace. I know this what your heart cry for
every woman should be in her home to
teach her children and ^{not} any place else.
No you nor me are any of us can change
this history it is the will of Allah that
we see in our time so let it be.
if you can leave New York altogether start
your real life and learn to pray to your
lord for help this is your help beyond
all other help, just have effort and Allah
will provide the way.

if necessary I will take the children
~~by~~ but they need a home, they are growing
up and need to have firm help. See if
it is existing and you can give them this.

This is what has cause us the problem
in our life and you do have something
to guide you take it like a man who
is in need of water take it my sister
ask Allah to save you from the death
of the slave.

I love you and the only thing I can
give you is DAWAH. Everything has been
washed from my life, I feel this and that

is the only true test of knowing God
because we never see or have anyone
confirm this belief only in full submission
to Allah so we feel His presence.

The Children have not been any real problem to
me, it is the people around me that are the problem
because they don't understand that they don't
have any thing and it is for this reason
that they will attack women and children
for fear their little material world
will be lost, not knowing, whether we
stay or go they will have the same
fears of losing what they never had.
These are fine boys, they have given me
so much just being here. Wish what to
stay with me you know, but Salim want
to come with you, both boys need you.
In my closing I pray Allah will grant
you this chance to build a family in-
sh-Allah.

May the Bless of Allah keep you.
