

Salam Comrades,

Have a plan that requires (2) small frame automatic's with grips removed and broken down, two full clips. Don't break down trigger housing. Get the people for escape route hooked up but need T.E. to get by dog's. Same thing i had hooked up for last may only this time nobody from outside, just material is needed. If you can't spare two at least one, get it to C soon as possible. Strange but this is the one you said would work on the one you seem being successful and you asking. This is your part in making it a success, other's <sup>(seeing it happen.)</sup> have mention it too. The Comrades who came by water last time want to strike by air this time but i'd rather use the bird for comrades upstate, plus i don't want the enemy to know just what we're really capable of at this time. Plus it takes a little more than just willingness. All of us got 30 days in the Bing for assault and attempted escape, the D.C.

might not take this to court as they want us out of here  
 so i plan to make this move within 10 days. These pieces  
 are ~~very important~~ What's good about this it doesn't en-  
 danger ~~himself~~ of the free comrades. We have corrected  
 problems of strategy by laying guidelines but tactically we  
 suffer outside because of a lack of tactical leadership.  
 Inside we have tacticians, as well as strategist, this  
 is not to say we don't outside but guerrilla warfare  
 is creative fighting the weak overcoming the strong their  
 initiative and being audacious, there is a great element of  
 risk involved but as Chairman Mao said he who is not  
 afraid of death by a thousand cuts dare's to unhorse the  
 empire which brings us to the slave who has nothing  
 to lose but his chains, some after wearing them so  
 long they of them as part of their dress so they  
 become comfortable in it. Man always has a choice  
 is chose freedom <sup>never</sup> ~~rather~~ slavery. The foulest death  
 is preferable to the noblest slavery. I am not suicidal  
 that's why i try so hard to get out of here for

this is nothing more than a slow death, constant oppression. A lot of dudes talk about these pits and maybe you may feel well it can't be all like the say's or he's just running off at the jibes; rhetoric but it ain't so send me those pieces and i'll take my freedom, it's not just important to me but other's also. Another thing those letters you want to edit my name must never appear on it, only the organization, what i wrote come from years of listening to people so in essence the people brought forth the ideas i just wrote them down therefore deserve no credit, neither do i wish to be known it would hamper my ability to move. I also wish to apologize for getting people involved in our personal life, to be truthful i had never looked at it as such, just like when i was captured i figured Comrades would care for you & the warriors not as a personal favor to me but because we as revolutionaries are suppose to care for one another. The struggle for total liberation requires total commitment to it so i can see where in my

personal life i may have been lacking yet if a few  
 sacrifice all for the many then it all balances out. Each  
 day i see the condition of man and it greatly saddens  
 me for he is a slave to his own ignorance. I cannot  
 compromise with oppression nor turn my back on injustice  
 i can find peace for a moment with a child, a woman,  
 or a walk in the park, that is only to gather my forces  
 to return to the fight. I had a need to explain myself  
 not so much to you but to myself since i felt as  
 a stranger. Why am i telling you this, some may think  
 i expect to die but actually i expect to escape & live  
 and therefore will have little time to explain anything  
 but the next few moves and what is to be done. Mike  
 Harold, & Gunnie will start trial around the 15<sup>th</sup> March  
 it'll last couple of months Inshallah.

Revolution Until Victory  
 Rich

Our experiences have taught us much and that's a  
 good thing "We Will Win"
